Product Bet Canvas

Treat a new product or feature as a bet: who has the problem, what you believe, the riskiest assumptions, and how you'll find out cheaply.

Decide What to Build · Bets, Not Plans · Four Big Risks (Marty Cagan) · Test the Riskiest Assumption First

IDEA _____

OWNER _____

DATE _____

1 The Problem

WHOSE, AND HOW BAD?

Who has it: _____

The problem, in their words: _____

How they cope today: _____

How often, how painful (1–5): _____

2 Our Bet

ONE SENTENCE, FOUR PARTS

We believe that (who): _____

will (do what): _____

if we (offer what): _____

because (what we know): _____

The smallest version we could try: _____

3 Why It's Worth It

VALUE AND COST

Value to users: _____

Value to us: _____

Cost of doing nothing: _____

Roughly what it'll take: _____

4 Riskiest Assumptions

CONFIDENCE 1 (GUESS) - 5 (PROVEN)

RISK	WE'RE ASSUMING…	CONF.
Value Will they want it?		
Usability Can they use it?		
Feasibility Can we build it?		
Viability Does it work for us?		

5 How We'll Test It

CHEAPEST FIRST

TEST	SIGNAL WE NEED	BY WHEN

6 Measures of Success

HOW WE'LL KNOW IT PAID OFF

MEASURE	NOW	TARGET	BY WHEN

We'll stop or change course if: _____

7 Decision

GO, TEST, PARK OR NO

- [ ] Go: build the smallest version
- [ ] Test first: run the tests above
- [ ] Park it: revisit later
- [ ] No: not worth it, and here's why

Why: _____

Decided by: _____

Revisit on: _____

"What would have to be true for this to be a good bet?"

"What's the cheapest way to find out we're wrong?"
