1% Experiment Canvas

Turn one small improvement idea into a testable experiment with a clear owner, measure and review date.

Companion to the Marginal Gains Workshop · Hypothesis-Driven Improvement · Build, Measure, Learn

EXPERIMENT # _____

TEAM _____

1 Where's the Friction? — FROM THE BOARD

Board area (tick one):

- ☐ Strategy
- ☐ Outcomes
- ☐ Product
- ☐ Teams
- ☐ Dependencies
- ☐ Engineering
- ☐ Delivery
- ☐ Learning

The pain point we observed:

_____

_____

_____

2 Hypothesis — IF · FOR · THEN · WE'LL KNOW

If we... (the change we will make)

_____

for... (who or which part of the system)

_____

then we expect... (the outcome or improvement)

_____

We'll know we're right when we see... (the signal or evidence)

_____

TIP: keep it small enough to start tomorrow

3 The 1% Change

What exactly will we do differently?

_____

_____

_____

Smallest version we could try first:

_____

_____

_____

4 Measure — BASELINE → TARGET

BASELINE
where we are today

TARGET
what 1% better looks like

HOW & WHERE MEASURED
source, frequency

Leading indicator (early signal): _____

Guardrail (what must not get worse): _____

5 Plan & Timebox

Owner: _____

Supporters: _____

Start date: _____

Mid-point check-in: _____

Review date: _____

Timebox: ☐ 1 iteration ☐ 2 iterations ☐ 1 quarter

6 Risks & Assumptions

- What must be true for this to work?
- What could go wrong, and how will we spot it?
- Who else needs to know or agree?

Add your sticky notes here

7 · RESULT & DECISION: COMPLETE AT THE REVIEW

What happened?

Result vs. target: _____

_____

_____

_____

Decision (tick one)

☐ **Persevere**
It worked.
Make it standard.

☐ **Pivot**
Promising.
Adjust and re-run.

☐ **Stop**
No gain.
Stop and share why.

What did we learn?

_____

_____

_____

Share the learning with: _____

"What's the smallest change that could prove us right or wrong?"

"If this works, who else would benefit from knowing?"
