Impact Map

Connect a business goal to the people who can help or hinder it, the behaviour changes you need, and what to build.

Envision & Plan · Inspired by Gojko Adzic's Impact Mapping · Why → Who → How → What

WORKED EXAMPLE · FICTIONAL TEAM

INITIATIVE: Reorder made easy

DATE: 20 February

1 The Map

READ LEFT TO RIGHT · EVERY DELIVERABLE TRACES BACK TO THE GOAL

WHY · GOAL
The measurable business goal

GOAL
Weekly repeat orders from 22% to 30% by end of Q2

Measure: weekly repeat-order rate

WHO · ACTORS
People who can help or get in the way

ACTOR 1
Busy families who shop every week

ACTOR 2
Store pickers

ACTOR 3
Customer service team

HOW · IMPACTS
How their behaviour needs to change

IMPACT 1
Reorder instead of rebuilding the basket

IMPACT 2
Come back every week, not every few weeks

IMPACT 3
Choose good substitutes for missing items

IMPACT 4
Pick reorders faster

IMPACT 5
Point customers to reorder when they call

IMPACT 6
Log "missing item" calls so we can spot patterns

WHAT · DELIVERABLES
Features or activities that could cause it

DELIVERABLE 1
Last-order card, one-tap reorder

DELIVERABLE 2
Usual-item reminders

DELIVERABLE 3
Substitute screen in the picking app

DELIVERABLE 4
Reorders grouped in the pick list

DELIVERABLE 5
A one-page reorder guide

DELIVERABLE 6
A call reason code

2 Riskiest Assumption

The impact we're least sure of: pickers choosing substitutes customers accept

How we'll test it: pilot in one store; track how many swaps are accepted

3 First Step

Deliverable to try first: last-order card with one-tap reorder

We'll know the impact happened when: repeat orders rise past 25%

"Whose behaviour has to change for us to reach this goal?"

"If we built only one thing, which impact would it move?"
