Opportunity Solution Tree

Connect a product outcome to customer opportunities, candidate solutions, and the assumptions to test first.

Envision & Plan · Continuous Discovery · Inspired by Teresa Torres · Assumption Mapping

WORKED EXAMPLE · FICTIONAL TEAM

LEGEND

- Blue = Opportunity
- Yellow = Solution
- Pink = Assumption
- Green = Test

1 The Tree

OUTCOME → OPPORTUNITIES → SOLUTIONS → TESTS

OUTCOME · ONE MEASURABLE PRODUCT OUTCOME

Weekly repeat orders rise from 22% to 30% by the end of Q2

OPPORTUNITY 1

A customer need, pain or desire

Rebuilding the weekly shop takes too long

SOLUTION

Reorder last basket in one tap

Riskiest assumption: *Customers want much the same basket*

Test: *Fake-door button on the home page*

Result: *31% clicked ✓*

SOLUTION

Saved favourites list

Riskiest assumption: *People will keep a list up to date*

Test: *Interview six customers*

Result: *Only 2 of 6 would*

OPPORTUNITY 2

A customer need, pain or desire

I forget items and have to place a second order

SOLUTION

Reminders for usual items

Riskiest assumption: *Reminders don't annoy people*

Test: *Email 500 customers*

Result: *Running*

SOLUTION

"You usually buy" list at checkout

Riskiest assumption: *Order history predicts well*

Test: *Back-test on the last 3 months*

Result: *78% hit rate ✓*

OPPORTUNITY 3

A customer need, pain or desire

Staples run out between weekly shops

SOLUTION

Subscriptions for staples

Riskiest assumption: *Payments can do repeat billing*

Test: *Spike with the Payments team*

Result: *Due 30 June*

SOLUTION

Auto-add staples to the basket

Riskiest assumption: *Customers trust auto-add*

Test: *Prototype test with 5 users*

Result: *Not started*

Compare and contrast: explore at least two or three solutions per opportunity before choosing.

Shared family lists · *Voice ordering* · *Recipe-to-basket*

2 Assumption Map

TEST TOP-RIGHT FIRST

IMPORTANCE ↑

Watch
Important · good evidence
Order history predicts well

Test First
Important · little evidence
Customers want the same basket
Payments can do repeat billing

Ignore for now
Less important · evidence
Reminders don't annoy

Park
Less important · little evidence
Customers trust auto-add

HAVE EVIDENCE — EVIDENCE → — NO EVIDENCE

3 Assumption Tests

SMALL, FAST, CHEAP

ASSUMPTION	TEST	SUCCESS IF…	RESULT
Same basket wanted	Fake-door button	over 20% click	31% ✓
Repeat billing	Payments spike	test charge ok	30 June
History predicts	Back-test	over 70% hits	78% ✓
Reminders welcome	Email 500 users	under 2% opt out	running

Types: desirable · viable · feasible · usable · ethical

"Which customer need, if we solved it, would move our outcome most?"

"What must be true for this solution to work, and how could we find out this week?"
