Sprint Planning

Agree why this sprint matters, what can be done, and how the team will start, in one visible plan.

Build in Iterations · Sprint Goal · Capacity · Forecast, Not Commitment to Every Item

WORKED EXAMPLE · FICTIONAL TEAM

TEAM: Basket team

SPRINT DATES: Sprint 14 · 3–14 Mar

1 Sprint Goal

WHY IS THIS SPRINT VALUABLE?

By the end of this sprint... returning customers can see their last order on the home page and reorder it in one tap.

We'll know we've achieved it when... a test user reorders in under 60 seconds

It supports this product goal: Reorder made easy (repeat orders 22% → 30%)

2 Capacity

BE REALISTIC

Working days: 9 (one public holiday)

People available: 5 of 6

Holidays & absences: Jo off Thu–Fri

Other commitments: Support rota, 1 person

Recent throughput (last 3): 7 · 9 · 8 items

Capacity this sprint: about 7 items (80%)

3 Inputs Checked

- [x] Product goal & roadmap reviewed
- [x] Top of the backlog is ready
- [x] Last review's feedback included
- [x] Retro actions planned in
- [ ] Dependencies known
- [x] Definition of Done visible

4 Selected Items

IN PRIORITY ORDER · STOP WHEN CAPACITY IS REACHED

Needed for the Sprint Goal

If we only finish these, the sprint still succeeds

- Show last order on the home page
- Reorder button adds every item
- Offer a substitute if out of stock
- Track reorder events

Also planned

Valuable, but they can move if the goal is at risk

- Save a basket as a favourite
- Reorder from order history
- Tidy the basket API (tech debt)

5 Risks & Dependencies

- What could stop us reaching the goal?
- Who outside the team do we need, and when?

- Stock API is owned by the Warehouse team: needed by Wed
- Analytics events need privacy sign-off

6 How We'll Start

THE FIRST DAYS

Day 1, we start with: Last-order card (Sam and Jo pair)

Pairing / swarming on: Out-of-stock rules (Alex and Priya)

First thing to finish: Last-order card, by Wednesday

7 Confidence Vote

FIST OF FIVE

1 No confidence · 2 Serious concerns · 3 / Some concerns · 4 /// Confident · 5 // Very confident

Any 1s or 2s? Concerns raised: None. Alex is worried about test data; Alex owns it.

"If we only achieve one thing this sprint, what should it be?"

"What would stop us from reaching the goal?"
