AI in Delivery

Decide where AI and AI agents fit in how you deliver, the guardrails for each, who's accountable, and whether it's helping.

Lead the Organisation · AI Governance · Assist · Approve · Act · People Stay Accountable

SCOPE _____

OWNER _____

REVIEW DATE _____

1 Where AI Fits

TICK ONE AUTONOMY LEVEL PER STAGE

STAGE	WHERE WE USE IT	ASSISTS	ACTS, WE APPROVE	ACTS ALONE	HUMAN CHECK
Discover & research		☐	☐	☐	
Plan & refine		☐	☐	☐	
Build		☐	☐	☐	
Test		☐	☐	☐	
Release & deploy		☐	☐	☐	
Operate & support		☐	☐	☐	

2 Autonomy Levels

MOVE UP ONLY WITH EVIDENCE

1 · Assists
AI suggests; a person decides and does the work.
Lowest risk. Start here.

2 · Acts, we approve
AI does the work; a person reviews it
before it counts.

3 · Acts alone
AI acts within set limits; people check
afterwards and can stop it.

3 Guardrails

AGREED BEFORE WE SCALE

- ☐ No confidential or personal data in unapproved tools
- ☐ AI output is reviewed like any other change
- ☐ Agents get the least access they need
- ☐ Generated code passes the same tests and scans
- ☐ AI use is visible in commits and tickets
- ☐ Licences and ownership of outputs checked
- ☐ A person can stop or roll back any agent

4 Risks to Watch

LIKELIHOOD × IMPACT, 1-3

RISK	L × I	WHAT WE'LL DO

5 Who's Accountable

PEOPLE, NOT TOOLS

Owns the AI policy: _____

Approves new tools: _____

Approves agent access: _____

Reviews AI incidents: _____

Trains and supports people: _____

Questions go to: _____

6 Is It Helping?

OUTCOMES, NOT USAGE

MEASURE	BEFORE	NOW	TARGET
Lead time for changes			
Change failure rate			
Rework and escaped defects			
Team experience (survey)			

7 Experiments & Review

SMALL, VISIBLE, REVERSIBLE

NEXT EXPERIMENT	OWNER	REVIEW ON

We review this whole board every: _____

"Where would we notice first if AI made our work worse?"

"Who's accountable when an agent gets it wrong?"
