AI in Delivery

Decide where AI and AI agents fit in how you deliver, the guardrails for each, who's accountable, and whether it's helping.

Lead the Organisation · AI Governance · Assist · Approve · Act · People Stay Accountable

WORKED EXAMPLE · FICTIONAL TEAM

SCOPE: Basket group
OWNER: Head of Digital
REVIEW DATE: September

1 Where AI Fits

TICK ONE AUTONOMY LEVEL PER STAGE

STAGE	WHERE WE USE IT	ASSISTS	ACTS, WE APPROVE	ACTS ALONE	HUMAN CHECK
Discover & research	summarise interviews	☑	☐	☐	researcher reads all
Plan & refine	draft acceptance criteria	☑	☐	☐	agreed at refinement
Build	code suggestions, tests	☐	☑	☐	review + tests + scans
Test	generate test data	☐	☑	☐	Alex checks samples
Release & deploy	release notes draft	☐	☑	☐	Priya approves
Operate & support	triage support tickets	☐	☐	☑	weekly sample check

2 Autonomy Levels

MOVE UP ONLY WITH EVIDENCE

1 · Assists
AI suggests; a person decides and does the work.
Lowest risk. Start here.

2 · Acts, we approve
AI does the work; a person reviews it
before it counts.

3 · Acts alone
AI acts within set limits; people check
afterwards and can stop it.

3 Guardrails

AGREED BEFORE WE SCALE

- ☑ No confidential or personal data in unapproved tools
- ☑ AI output is reviewed like any other change
- ☑ Agents get the least access they need
- ☑ Generated code passes the same tests and scans
- ☐ AI use is visible in commits and tickets ← not yet
- ☑ Licences and ownership of outputs checked
- ☑ A person can stop or roll back any agent

4 Risks to Watch

LIKELIHOOD × IMPACT, 1-3

RISK	L × I	WHAT WE'LL DO
Invented API fields	2×3	tests catch them
Customer data in prompts	1×3	approved tools only
Agent closes real tickets	2×2	weekly sample; can pause it
Skills fade	2×2	pair; keep reading code

5 Who's Accountable

PEOPLE, NOT TOOLS

Owns the AI policy: Head of Digital
Approves new tools: IT security
Approves agent access: Platform lead
Reviews AI incidents: incident review, as usual
Trains and supports people: Sam and Mei
Questions go to: #ai-help

6 Is It Helping?

OUTCOMES, NOT USAGE

MEASURE	BEFORE	NOW	TARGET
Lead time for changes	7 days	6 days	5 days
Change failure rate	12%	11%	under 10%
Rework and escaped defects	1 in 9	1 in 10	same or better
Team experience (survey)	3.6 / 5	3.9 / 5	4 / 5

7 Experiments & Review

SMALL, VISIBLE, REVERSIBLE

NEXT EXPERIMENT	OWNER	REVIEW ON
Agent drafts support replies; a person sends them	customer service lead	1 July
AI writes test data from real order patterns	Alex	Sprint 20

We review this whole board every: quarter, with the AI Working Agreement

"Where would we notice first if AI made our work worse?"

"Who's accountable when an agent gets it wrong?"
