Impact Map

Connect a business goal to the people who can help or hinder it, the behaviour changes you need, and what to build.

Envision & Plan · Inspired by Gojko Adzic's Impact Mapping · Why → Who → How → What

WORKED EXAMPLE · FICTIONAL TEAM

INITIATIVE: Reorder made easy

DATE: 20 February

1 The Map

READ LEFT TO RIGHT · EVERY DELIVERABLE TRACES BACK TO THE GOAL

WHY · GOAL
The measurable business goal

WHO · ACTORS
People who can help or get in the way

HOW · IMPACTS
How their behaviour needs to change

WHAT · DELIVERABLES
Features or activities that could cause it

GOAL
Weekly repeat orders from 22% to 30% by end of Q2

Measure: weekly repeat-order rate

ACTOR 1
Busy families who shop every week

- IMPACT 1: Reorder instead of rebuilding the basket
  - DELIVERABLE 1: Last-order card, one-tap reorder
- IMPACT 2: Come back every week, not every few weeks
  - DELIVERABLE 2: Usual-item reminders

ACTOR 2
Store pickers

- IMPACT 3: Choose good substitutes for missing items
  - DELIVERABLE 3: Substitute screen in the picking app
- IMPACT 4: Pick reorders faster
  - DELIVERABLE 4: Reorders grouped in the pick list

ACTOR 3
Customer service team

- IMPACT 5: Point customers to reorder when they call
  - DELIVERABLE 5: A one-page reorder guide
- IMPACT 6: Log "missing item" calls so we can spot patterns
  - DELIVERABLE 6: A call reason code

2 Riskiest Assumption

The impact we're least sure of: pickers choosing substitutes customers accept

How we'll test it: pilot in one store; track how many swaps are accepted

3 First Step

Deliverable to try first: last-order card with one-tap reorder

We'll know the impact happened when: repeat orders rise past 25%

"Whose behaviour has to change for us to reach this goal?"

"If we built only one thing, which impact would it move?"
