Value Metrics

Measure the value you deliver and your ability to deliver more, then pick experiments to improve it.

Lead the Organisation · Inspired by Evidence-Based Management (Scrum.org) · Four Key Value Areas

WORKED EXAMPLE · FICTIONAL TEAM

PRODUCT / ORG: Basket group

DATE: 9 May

1 Goals

BIG AND FAR · NEXT MILESTONE · NOW

Strategic goal — *The big, long-term ambition*

The first place families think of for the weekly shop (top 3 in our regions)

Intermediate goal — *The next milestone toward it*

Repeat orders at 30% and basket time under 10 minutes, by the end of the year

Immediate tactical goal — *What we're working on now*

Reorder made easy: one-tap reorder and substitutes, this quarter

2 Current Value

VALUE DELIVERED TODAY

How much value do customers get now?

EXAMPLE MEASURES

- [x] Customer satisfaction
- [x] Usage / adoption
- [ ] Revenue per customer
- [ ] Employee satisfaction

OUR MEASURE	NOW	TARGET	TREND
Repeat orders a week	25%	30%	better
Reorder satisfaction	4.0	4.3	better
Weekly users	182k	200k	flat

What the numbers tell us:

Repeat customers come back more often; satisfaction is up since the reorder card.

3 Unrealised Value

VALUE STILL ON THE TABLE

How much more value could we deliver?

EXAMPLE MEASURES

- [ ] Market share gap
- [x] Unmet customer needs
- [x] Demand we can't serve
- [ ] Competitor gaps

OUR MEASURE	NOW	TARGET	TREND
Lapsed customers	41k	30k	flat
Want subscriptions	31%		new

What the numbers tell us:

A third of visitors want subscriptions: a big need we don't serve yet.

4 Time to Market

HOW FAST WE LEARN & DELIVER

How quickly can we deliver and learn?

EXAMPLE MEASURES

- [x] Lead / cycle time
- [x] Release frequency
- [ ] Time to first feedback
- [x] Time to fix

OUR MEASURE	NOW	TARGET	TREND
Lead time (85%)	12 d	7 d	better
Releases a week	2	5	better
Time to fix	3 d	1 d	flat

What the numbers tell us:

Releases wait on Payments sign-off; self-service checks should halve lead time.

5 Ability to Innovate

WHAT SLOWS NEW VALUE

What stops us delivering new value?

EXAMPLE MEASURES

- [x] % time on new features
- [x] Technical debt
- [ ] Defect trends
- [x] Time lost to blockers

OUR MEASURE	NOW	TARGET	TREND
New feature time	55%	70%	better
Blocked days	9	3	worse
Escaped defects	4	1	flat

What the numbers tell us:

Blocked time is rising: three items waited on other teams last iteration.

6 Experiments to Improve

ONE PER KEY VALUE AREA AT MOST

AREA	EXPERIMENT	MEASURE WE EXPECT TO MOVE	OWNER
Time to market	Self-service release checks, agreed with Payments	Lead time 12 → 7 days	Tom
Ability to innovate	Basket gets read access to stock data	Blocked days 9 → 3	Sam

7 Review Rhythm

Measures updated every: iteration

Reviewed with leaders at: the monthly product review

Next review: Wednesday 4 June

"How do we know we're delivering value, not just output?"

"What's stopping us from delivering more value, sooner?"
